

*A gorgeous walk in Tregothnan Estate*

## **Inspiring Gardens Worldwide**

Dear Friends,

Gardens are special places. Whether they're lovingly crafted in our backyards or lavishly landscaped in the world's most beautiful destinations, they are havens of tranquility ... and often, surprises. You may find yourself surrounded by fragrant roses not far from the bustle of London or discovering the natural flora of the Cornwall seaside. You might be among the first to explore an edible forest in France or glimpse a monal pheasant or red panda in a Bhutan botanical garden.

For the green thumbs among your travelers, we share these glorious gardens close to our Rebecca Recommends clients. Some are right on-site, many are nearby the properties, while others can be visited privately, thanks to our expert DMCs. From New Zealand to Sri Lanka, New York City to Greece, you can indulge nature-loving travelers in the beauty that our world needs at this moment in time. Allow us to put you in touch.

Fondly,

*Rebecca*
